Turas

The complete survey analytics system

WHAT IS TURAS?

Your Research Should Work Harder

01

Good Data, Limited Life

You commission research and get a deck that answers the questions you asked at the time.

New Questions, Old Process

When a new question surfaces, someone has to reopen the dataset and rebuild the analysis. That takes time and money.

Turas Changes That

Most research ends up as a presentation rather than a resource.

What Turas Delivers

Interactive Analytics

An interactive resource your team can explore, share, and return to.

Rigorous Statistics

Built on validated, open-source statistical methods — not proprietary algorithms.

Permanent Record

One dataset. One report. Useful for as long as the data is relevant.

Pay Per Project

No subscriptions. No licence costs. No installations.

Bring Your Own Data

Works with any survey dataset, whether fieldwork was commissioned through us or not. Got old data gathering dust? We can re-run it through Turas and discover insights you never got to.

World-class analytics on demand. No strings attached

Serious Statistical Foundations

Built on R

The open-source statistical environment used by national statistics offices, central banks, and universities worldwide.

Fully Transparent

Every calculation is inspectable. Methods can be examined and verified.

No Black Boxes

When a finding is challenged, you have a clean, traceable analytical record to stand behind.

Every result traces directly back to the underlying tables

Professional Oversight

Turas is not a self-service tool

SAMRA Accredited

The Research LampPost is an organisational member of the Southern African Marketing Research Association.

Duncan Brett developed Turas and is a SAMRA-Accredited Researcher.

Guided End-to-End

Every project is guided from data preparation through to final output. The right methods are applied, data is structured correctly, and results are interpreted responsibly.

30+ years of quantitative market research expertise behind every project

DATA SECURITY

Your Data Stays With You

05

Completely Handled In-House

Your data is analysed entirely on our own hardware — never processed by a third-party analytical platform or shared with an external service.

Immutable Record

The delivered report is finalised and self-contained — it cannot be altered after the fact.

A stable record of exactly what the data showed at the time of analysis

SPEED & RELIABILITY

Fast, Consistent, Dependable

06

1 Day*

Preliminary output once data is clean and formatted

Weeks

Traditional analysis timeline

*Post data cleaning. Actual turnaround depends on data layout and processing complexity.

Built-in Consistency

Same methods, every time. For tracking studies, results stay comparable across waves.

Controlled computational environment. Reproducible results. Every time

THE DIFFERENCE

See for yourself

07

From this...

			Region				Age Group				Gender		
Question	Type	Total	Metro	Urban	Suburban	Rural	18-29	30-44	45-59	60+	Male	Female	Non-binary
Q04 - How often do you drink coffee?													
	Base (n=)	160	48	51	50	11	38	59	33	30	67	84	9
Daily	Frequency	67	17	18	27	5	14	25	14	14	27	35	5
	Column %	42	35	35	54	45	37	42	42	47	40	42	56
Several times a week	Frequency	41	16	15	7	3	13	14	7	7	17	20	4
	Column %	26	33	29	14	27	34	24	21	23	25	24	44
Weekly	Frequency	26	5	9	12	0	7	10	5	4	13	13	0
	Column %	16	10	18	24	0	18	17	15	13	19	15	0
Less often	Frequency	26	10	9	4	3	4	10	7	5	10	16	0
	Column %	16	21	18	8	27	11	17	21	17	15	19	0

- ✗ Static rows and columns that are hard to read
- ✗ Insights disconnected from the data behind them
- ✗ Filed away, rarely revisited

To this...

- ✓ Interactive, filterable, explorable tables
- ✓ Insights your team actually uses
- ✓ Build & present a narrative without leaving the report

Not a dashboard. Not a PDF. A living report your whole team can explore

Your Data, Alive

A Turas report isn't a flat file you scroll through. It's an **interactive experience** — intuitive enough for anyone on your team to explore with minimal training. And when you need to go deeper, specialist analytical modules sit inside the same report.

Static PPT / PDF

- ✗ Fixed views — what you see is all you get
- ✗ New question? Ask the analyst, wait days
- ✗ Sits on a shared drive, rarely reopened
- ✗ One person's interpretation, locked in

Turas Interactive Report

- ✓ Interactive, filterable, explorable tables
- ✓ Insights your team actually uses
- ✓ Build and present a narrative without leaving the report
- ✓ Deeper analysis? It's all in the same report.

Browser-Based

Nothing to install. Open a file and go

Table + Chart Views

Switch between views with one click

Excel Export

Pull any table into Excel whenever you need it

Research your whole team can use

Build Your Story

Exploring the data is just the start. With **pins**, you capture the charts and tables that matter and arrange them into a narrative others can follow.

1

Explore

Browse the interactive report. Filter, compare and switch views.

Plain-language callouts explain what you're seeing and what it means.

2

Pin

Save key charts, add commentary and arrange them into a clear narrative

3

Present

Walk stakeholders through your story in-file, or export to PowerPoint or PDF

You don't just receive results — you build the story you want to tell.

One environment for exploration, narrative-building, and presentation — no tool-switching required.

What Turas Can Analyse

Specialist analytical modules, all delivered within the same interactive report

Tabs
Automated crosstabs with significance testing

Tracker
Multi-wave trend analysis across waves

Key Driver
Strongest factors driving business outcomes

Key Driver (Cat.)
Regression for categorical outcomes

Segment
Statistical clustering for customer groups

Conjoint
Choice modelling with market simulator

MaxDiff
Precise preference rankings with TURF and a simulator

Pricing
Van Westendorp, Gabor-Granger with simulators and monadic models

Weighting
Target population representation

Confidence
Rigorous validity testing

Multiple modules can be combined into a single report.
Advanced modules include plain-language callouts that guide users through the statistics — so the outputs are understood, not just delivered.

What We Can Help With

Questionnaire Design

Structuring questions to produce clean, analysable data

Analytical Planning

Choosing the right methods and structuring the approach

Data Preparation

Cleaning, coding, and preparing data for rigorous analysis

Interpretation

Making sense of results and building a clear narrative

Third-Party Data

We can evaluate and prepare existing datasets for analysis, regardless of source

For most projects we also prepare an initial set of pinned views, giving your team a ready-made starting point

See It In Action

The most effective way to understand Turas is a live demonstration.

We can walk through a demo dataset and show how survey data becomes a working analytical resource — from raw data to interactive report.

Let's look at a live report

Turas

Complete analytics. No strings attached
